

Li Chengjin / Chengjin Li

Personal Information

Phone: 17732025285
Email: chengjinli@std.uestc.edu.cn
Address: UESTC Qingshuihe Campus, Chengdu, Sichuan, China
Project Site: https://study-hub.cn

M.S.–B.Eng. student in Information and Communication Engineering at UESTC, focusing on **deep learning**, **medical imaging algorithms**, **agent systems**, and **full-stack engineering**, with experience in research, system implementation, and open-source projects.

Education

University of Electronic Science and Technology of China 2025–2028
M.S. in Information and Communication Engineering
University of Electronic Science and Technology of China 2021–2025
B.Eng. in Information and Communication Engineering

Projects

StudyHub | Campus Knowledge-Sharing Platform Repository: github.com/ChengjinLii/studyhub
Independently designed, built, and operated a campus knowledge-sharing platform covering materials, experience sharing, requests, and marketplace scenarios; built an **AI search/recommendation/moderation** layer, a **read-only secure MCP** tool interface, and a **learning-agent foundation** for material retrieval, recommendation, problem-explanation assistance, and learning-event persistence; reached **345 users** and **1,628 downloads**. Stack: **FastAPI**, **Next.js**, **MySQL**, **Redis**, and **OSS**.

dMRI-Agent | Protocol-Driven Agent System for dMRI Repository: github.com/ChengjinLii/MRI_Agent
Designed and implemented a **protocol-driven agent system** for diffusion MRI workflows using a **planner/executor** architecture and structured protocol control; supports **task planning**, stage execution, **QC tracking**, and **structured logging**. Related manuscript is **submitted to Nature Communications**.

SlicerDDSURfer | 3D Slicer Extension Repository: github.com/ChengjinLii/SlicerDDSURfer
Developed a 3D Slicer extension that **unifies** DDSURfer, DDParcel, DDSeg, and Microstructure diffusion MRI pipelines under a consistent interface with shared **input validation** and **workflow orchestration**, while reserving extensibility for **tractography**, **connectomics**, and visualization modules. Related protocol manuscript is **submitted to Nature Protocols**.

DDSURfer | dMRI Cortical Surface Reconstruction Repository: github.com/ChengjinLii/DDSURfer
Implemented a DTI-based pipeline for **white and pial surface reconstruction**, covering preprocessing, dual-stream inference, template-space prediction, and native-space back-projection for cortical surface reconstruction from diffusion MRI. Related work has been accepted by **Advanced Science (JCR Q1/top-tier journal, Impact Factor 14.1)**.

Research

- DDSURfer-related work accepted by **Advanced Science (JCR Q1/top-tier journal, Impact Factor 14.1)**; additional work accepted by **ISMRM 2025** as an **Oral Presentation** and by **OHBM 2025** as a **Poster Presentation**.
- **Third Prize** (3rd place) in the poster session at **ISICDM 2025**.
- **Third Prize** (5th place) in both the classification and segmentation tracks of the **MICCAI 2025 PDCADxFoundation Challenge**.

Honors

- **Gold Award** at the UESTC campus round and **Silver Award** at the Sichuan provincial round of the China International College Students' Innovation Competition (2024).
- **Gold Award** at the UESTC campus round and **Bronze Award** at the provincial round of the 14th "Challenge Cup" Business Plan Competition (2024).
- **First Prize** in the AI Track, Southwest Regional Contest, China Graduate Electronics Design Contest.
- **National Third Prize**, Huawei Cup China Undergraduate Mathematical Contest in Modeling (2025), serving as **team leader**.
- University-Level **Outstanding Student Scholarship** for four consecutive academic years; **UESTC Undergraduate Innovation Award**.

Skills

Programming: Python / TypeScript / C / MATLAB; **Deep Learning & Imaging:** PyTorch / 3D Slicer / SimpleITK / nibabel; **Full-Stack & Backend:** FastAPI / Next.js / MySQL / Redis / OSS; **Engineering Tools:** Docker / Git.
